# Installing the Battery in a Bosch Rexroth RCU
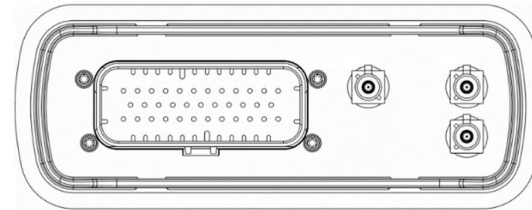

Bosch Rexroth RCU

Front side

Battery compartment

Rear side

[sources: Rexroth]

The battery is used so that even when the tractor is switched off, the RCU is ready for operation and can send and receive data.

(1) The battery is installed at the front of the RCU.

(2) To remove the front cover a screwdriver can be used.

(3) The battery compartment is on the left side.

(4) Insert the battery into the battery compartment so that the connecting cables are on the right-hand side.
(5) Plug in the connecting cables as shown in the picture.

(6) Close the case by carefully pressing the front cover onto the case.
